## Summary

---

Hi, my name is Omer Tairi, and I'm from Kumanovo, North Macedonia. I'm 18 years old and I'm really interested in working as a software engineer. I'm currently in my final year of high school, which is a four-year program, and I'm really excited to finish and start my career. I've taken many programming courses and have learned to code in languages like Python, Javascript, HTML, and CSS. I'm really passionate about learning new things and staying up-to-date with the latest technology. In my free time, I enjoy cycling and exploring new places. I believe my passion for learning and my programming skills make me a strong candidate for a career in software engineering.

## Experience

---

**Eisa Al-Maliki | Dubai, UAE**

**Freelance Developer | 10/2022 - 01/2023**

I had the opportunity to work as a freelance developer for an individual based in Dubai, UAE. I worked on both the back-end and front-end components of the project. I used the Django framework for the back-end, which is a popular web application framework based on Python. Working on this project helped me develop my skills as an independent developer and taught me how to manage multiple responsibilities at once. It was a great experience, and I am proud of the quality solutions I was able to deliver to my client. I believe that my experience as a freelance developer has given me a valuable skillset that will be useful in future projects and employment opportunities.

## Skills

---

Python, JavaScript, HTML 5, CSS, Django, MySQL

## Education

---

**Nace Bugjoni | Kumanovo, Kumanovo**

**ELEKTRO | 05/2023**

I'm really proud of my academic achievements in high school. I worked really hard and was able to achieve the highest grades possible, which is something that I'm really proud of. I was also given the opportunity to represent my school in a few contests, which was a really cool experience. It was great to be able to showcase my knowledge and skills in front of other students and teachers. These experiences helped me develop my confidence and public speaking skills, which I believe will be really useful in the future. Overall, I think my academic achievements and participation in school contests demonstrate my dedication to learning and my ability to succeed in challenging situations.
